Brainspace Establishes Partnership with Information Governance Integrator GEN3i

GEN3i Inc. a leading information governance integrator has formed a deep partnership with Brainspace to serve as a Development Partner, Solutions Provider and Systems Integrator of Brainspace products

[Brainspace](#), the leader in advanced visual analytics and machine learning solutions, announced today that they have established a partnership with [GEN3i Inc.](#), a leading information governance integrator. GEN3i will serve as a Development Partner to Brainspace and act as a Solutions Provider and Systems Integrator to their clientele.

"The market for unstructured data analytics is experiencing incredible growth today." said Dave Copps, CEO Brainspace. "Inside this growing space there is not another product that can match the features of Brainspace Discovery 5. We are creating visualization and analytics capabilities on unstructured data that have only been seen in structured data analytics platforms. Working with GEN3i helped accelerate our speed to market while adding tremendous value for our clients and partners."

The newly released [Discovery 5](#) is the latest version of Brainspace's unstructured data analytics and eDiscovery solution. Discovery 5 utilizes the company's core machine learning technology and powerful data visualization to surface answers and insights from millions of documents. This new release features [Communication Analytics](#) and the ability to connect with hundreds of new 3rd-party data sources.

"We are very excited about the partnership. Our team is playing a key role in the integration between Brainspace and several 3rd party tools." said Patrick Vaughan, CEO GEN3i. "Our current development work enables Enterprise Data Connectivity which will help make Discovery 5 a leader in the unstructured data analytics and eDiscovery markets."

Enterprise Data Connectivity - Multiple Data Sources & File Types

For users to gain the most insight they must be able to interact with as much data as possible and not be restricted by the type of unstructured data and system. Access to hundreds of new data sources, including Microsoft Sharepoint and Microsoft Exchange EDB files is now available in Discovery 5. As an OEM partner of both Brainspace and Nuix, GEN3i integrated the Nuix engine into Discovery 5 providing a straightforward capability to import from multiple sources, allowing users to surface even more connections and meaning than ever before.

If you're interested in learning more about how Brainspace Discovery 5 can unlock your organization's dormant knowledge assets and improve your connectedness, please contact GEN3i at info@GEN3i.com.

About [Brainspace](#)

Brainspace Corporation (formerly PureDiscovery) builds software that unlocks the business value of information trapped in unstructured data. Brainspace builds 'connectedness' between people and information, evaluating content, concepts and context—determining not just relevance, but value. Our unique suite of solutions are transforming the way we find and connect data, people and knowledge. For more information and

About GEN3i

GEN3i is a Next Generation VAR focused on delivering integrated proven solutions to clients that meet the demands of IT, Information Governance (IG), and the business users. The GEN3i team has proven expertise in various aspects of the enterprise information chain including legal, regulatory, IT operations, enterprise backup, and information archiving. But, most importantly we are focused on building out and validating fully integrated solutions before they are installed at any client. This allows us to offer proven solutions that others can only promise in slide decks.
