

Over a decade delivering data management and migration services to commercial and government agencies. Our business can mobilize the right people, skills and technologies to help organizations improve their performance.

OUR SERVICES

DATA PROTECTION

Our Data Protection Services focus on implementing and administering best of industry data protection products. In doing so, your company data will be protected to meet retention times and service level agreements. Our recommended data protection products include: Cohesity, Commvault, Veritas BackupExec and NetBackup, Rubrik

RECOVERY

Our Recovery Services focus on restoration of data from any application in any digital format. By liberating the data, your business will increase value and insight. Our recovery solutions can handle: Any digital tape format from any backup application, WORM, CD/DVD, and Disk

MIGRATION

Our Migration Services focus on migration of data from "point to point". By migrating to newer technology, your business will increase cost savings and decrease failure of legacy systems. Our "point to point" solutions are:

1. Tape to Disk/Tape/Cloud
2. Disk to Disk/Tape/Cloud
3. eMail/File Archive to PST/Cloud

FLEX RSE

Our Flexible RSE allows an organization to utilize an engineer when they are needed instead of an expensive full time engineer that is being underutilized. This type of resident engineer is used mostly in the administration of your company's data protection environment.

MANAGED SERVICES

Our Managed Services will take the burden off of the company human resources to administer and maintain data protection systems while moving from a Capital Expenditure (CapEx) to an Operational Expenditure (OpEx) as a monthly subscription.

CUSTOM DEVELOPMENT & INTEGRATION

Our staff will integrate various software applications and business processes to remove unwanted manual tasks and workflows and enable your staff to work on their primary job functions. We will also develop custom applications to meet the needs of your organization.
